Projects

Scoops on Wheels - 2019

- Developed an Uber-like iOS and Android app for Ice cream company.
- The app had two mini apps inside which allowed the truck drivers and customers to use the same app. Users could see ice cream trucks location in realtime and request one to deliver ice cream.
- The app was developed using React Native and Firebase.

Alythia - 2018

- Developed passwordless authentication system in a team of 4 developers.
- Server was powered by NodeJS, Express, PostgreSQL and Redis.
- Created mobile app with React Native and crafted front-end with React and Redux.
- Designed font-end with Materialize.

Casa de Aves – July 2018

- Developed E-commerce site with a team in Agile Environment.
- Back-end is powered by Node.js, Express, and PostgreSQL
- Front-end was built using React and Redux.
